November 2018

Dear Parent/Carer

Year 11 Mathematics

Thank-you for all your hard work and support with your daughter/son's revision and preparation for the recent Paper 2 Assessment. We are now in the process of analysing the Paper 2 scripts and supporting students in filling the gaps in their knowledge and ironing out misconceptions. Videos are now available on 'teams' if your student needs to go over anything at home and look out for the Pinpoint booklets coming home.

In order to make sure everyone has as much time to structure a careful revision plan as possible I have sent out the revision list for the final paper in the series. This will be sat on the Monday 10 December and I am now sending out the list to you as parents and carers.

For students sitting **Higher Tier** the revision list is attached, it has hyperlinks to booklets and a video for each topic; I have set it into a calendar to help students break it into more manageable chunks.

For students sitting **Foundation Tier** the revision list has been set as an assignment on Mathswatch containing clips and interactive questions for each topic, but there is also a revision list of topics set into a calendar attached in case it is useful for them.

Mathswatch login: User: JSmith@downlands

Your son/daughter will be sitting Assessment Paper 3 on **Monday 10 December**. This is another **calculator** paper and it will be extremely important again that your student comes fully equipped with:

- calculator
- pen
- pencil
- ruler
- rubber
- protractor
- compass

I hope that your daughter/son is feeling supported and I would encourage them to come along to study club after school on a Wednesday until 4pm. We work specifically on past paper exam questions in order to build up student's exam confidence.

Many thanks again for the hard work supporting and encouraging your child.

Yours faithfully

Mrs E Morris
Maths KS4 Co-ordinator
