November 2018

Dear Parent/Carer

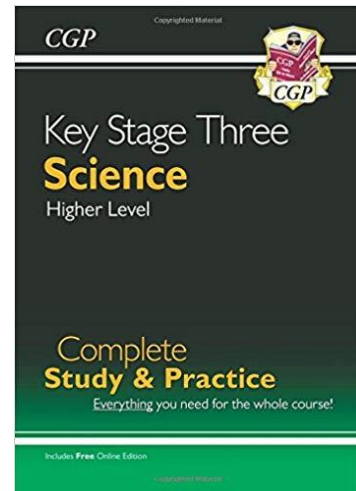

### Year 8 Science Assessment – Week beginning 26 November 2018

The Science Department's autumn assessment will cover the two topics so far and this will be in one of the lessons in the week beginning 26 November. Your daughter/son's teacher will inform them in which lesson in that week it will be.

Below are the topics that will be covered and it will consist of half a paper of short answers to test knowledge and the other half being longer answers to test application.

- **Inventors** – static electricity, circuit diagrams, resistance, potential difference, current, magnets, electromagnets.
- **Sci-Fi** – waves, sound, the ear, reflection and refraction of light, dispersion, the eye and colour.

To help with revision, students can use the KS3 revision guide that was available in Year 7 pictured below to the left. There is also the CGP KS3 Science Revision Guide pictured below to the right. This one can be bought online via Scopay for £5.80 and picked up from our Science Technicians (with picture or email evidence of the receipt provided to the student).

You can also use BBC Bitesize and Doodle to help in preparation for the assessment. I have also put a folder of revision on Doodle for this purpose.

Yours faithfully,

M Lowe

M Lowe  
KS3 Coordinator Science
