April 2019

Dear Parent/Carer

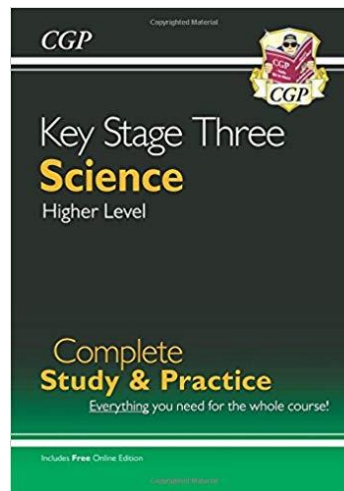

### Year 7 Science Summer Assessment – Week beginning 13 May 2019

The Science Department's Summer assessment will cover the two topics below and this will be in a lesson the week beginning 13 May. Their teacher will inform them which lesson in that week it will be.

Below is the detail of the topics that will be covered and the assessment will consist of initially short answers to test knowledge and a Maths in Science section and then some longer exam style questions in a section testing Science investigation and application skills.

- **One Born** – male a female human reproduction, the menstrual cycle, fertilisation and pregnancy, inheritance and types of reproduction and flowering plants.
- **Theme Park** – energy stores, energy transfers, thermal energy transfers (conduction, convection and radiation), conservation of energy renewable and non-renewable energy and electricity bills.

For revision resources, there is the KS3 revision pictured below. This one can be bought online through our school for £5.80 and picked up from our Science Technicians (with picture or email evidence of the receipt provided to the student).

You can also use BBC Bitesize and Doodle to help in preparation for the assessment. I have also put a folder of revision on Doodle for this purpose.

Yours faithfully,

M Lowe

M Lowe  
KS3 Coordinator Science
